

# MetronVIEW

## Web Based Data, Alarms and More

A hosted software platform that receives data from remote devices and allows you to view the data securely via the internet. on your computer, tablet or smartphone.

Able to receive data from hundreds of thousands of devices and scalable to cope with more

Receive alarms  
Pull data via API

- View 'live' and historical data from sensors and machines via the internet.
- Receive alarms if a threshold is breached, an alarm trips or if communication is missed.
- Remotely program devices via the internet.
- Compatible with tens of thousands of sensors.
- Export data or retrieve via our API to use in other software.
- Easily branded with colour and logo and supports multi level user access.

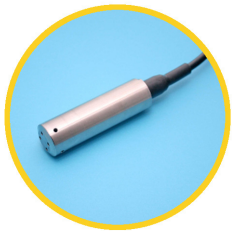

**Powelectrics**  
sensing & telemetry solutions

**Powelectrics Limited**

**Metron**  **VIEW**  
Telemetry that makes sense

# MetronVIEW is compatible with.....

**Thousands of sensors via the Metron2, covering level, temperature, pressure, flow, wind speed & direction, vibration, humidity and more...  
Easy setup, with no need for coding.**

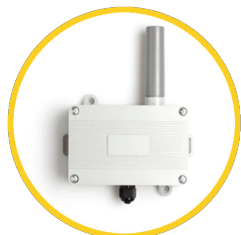

**Metron2 telemetry device with 4 inputs and available as a battery, solar or mains powered device. Remotely programmable and very flexible.**

**MetronATEX telemetry device designed for LPG tank monitoring. Battery powered with 6 inputs for excellent value on sites with multiple tanks.**

**MetronG - gets data serially from PLC's and radio systems such as the MetronR.**

**MetronR - battery powered radio transmitters with exceptional range capable of sending meter readings as well as data from sensors.**
