

# MetronATEX

## LPG Tank Level Monitoring

The MetronATEX is a reliable, robust & affordable GSM telemetry device for use in explosive atmospheres. Installation is quick and easy, with no intrusion into the customer's property.

- **Dramatically reduce distribution costs - deliver only when required.**
- **Receive alarms at levels, programmable per tank.**
- **Monitor 6 tanks cost-effectively with one device.**
- **Improved customer service - eliminate run-outs.**
- **View data securely online using our Metron VIEW platform.**
- **Low running costs with GPRS communications.**

Parameter	Details
Inputs	6 (0-5Vdc sensors eg Rochester gauges or volt free contacts)
Communications	Integrated GSM (GPRS or SMS)
Power Supply	Integral battery. Typical life 3 years with daily readings.
Sensor Excitation	Provides 5 Volts for the sensors
Environmental	IP67, -15 to +45 deg C.

# MetronTMS Tank Monitoring Software

A hosted software platform that receives data from remote devices in the field and allows you view the data securely via the internet using a computer, tablet or smartphone. Receive alarms via email (SMS possible on request) and collect the data via an API. Available complete with roaming sim cards. Compatible with many telemetry systems to suit diesel, petrol, biofuels, lubricants, chemicals (including AdBlue), waste, fertilisers, foodstuffs including milk and animal feeds.

- **View data securely online using our web based platform.**
- **Receive alarms when tanks are getting empty.**
- **Increase delivery volumes and reduce part load returns - more efficient logistics.**
- **Improved customer service.**
- **Initiate proactive delivery scheduling.**
- **Provide an audit trail.**

The **colour coded system**, which includes mapping, means you can see at a glance what tanks need filling and where they are.
