

Good news for tanks everywhere

Is your business facing increased costs?

Are your customers getting more demanding?

Do your customers ever run out of product?

Do you fill tanks at the most cost effective-time..?

Do your customers forget to order and expect you to put them first?

Would you like to build a closer relationship with your important customers?

Solutions for dry and liquid feed as well as fertiliser

Level sensors are fitted to the tanks.

Readings are sent using the mobile phone networks.

You can see the tanks via a secure login using the internet.

Alarms can be sent to you (or your customer) when the tanks are nearing empty.

Liquids and dry products.
