

Good news for tanks everywhere

Don't struggle under the weight of increased cost, competition and congestion...

Is your business facing increased costs?

Do you suffer from fuel theft?

Do you ever run out of fuel?

Would you like to check the right amount has been delivered?

Is it time consuming getting end of month stock reports?

Level sensors are fitted to the tanks.

Readings are sent using the mobile phone networks.

You can see your tanks via a secure login using the internet.

Alarms can be sent to you when the tanks are nearing empty or even when there is a suspected theft or leak.
